

### Supplementary Figure S2

**Supplementary Figure S2.** z-score distribution of ROI-qAF analysis. Within the ring shows the z-score distribution of ROI-qAF values of RP eyes (measurements taken within the inner and outer border of the SW-AF ring) and corresponding ROI-qAF values of healthy eyes. Measurements external to the ring represent z-scores of ROI-qAF values acquired immediately external to the outer SW-AF border of the ring in patients with small rings and in corresponding areas of healthy individuals.
