Supplementary Figures:

Supplementary Figure S1 | Two Sample Logo between the negative subset and the whole non-methylated samples for arginine and lysine methylation, respectively.

Supplementary Figure S2 | 3D-structural of methylation peptide for arginine and lysine, respectively. The amino acid in green color is the methylation site. The red ones represent that these residues far away from methylation in sequence are closer to the methylation site in structure as compared to the blue ones.

Supplementary Figure S3 | ROC curves of 5-fold cross-validation on 10 training sets for arginine and lysine methylation, respectively.

Supplementary Tables:

Supplementary Table S1| A summary of IG score of positions for arginine and lysine methylation peptide.
