

**Supplementary FIG S1. Reproducibility of quantification of the secretome protein quantification in four biological replicates.** Pearson correlation coefficient between the replicates are shown in each plot. A. HBECS, control cells. B. HBECS, RSV infection for 24 h. C. HSAECs, control cells. D. HSAECs, RSV infection for 24 h.

## Supplemental Table I.

Cell Type	Lot #	Sex	Age
hBEC	1	Male	66
hBEC	2	Male	67
hBEC	3	Male	28
hSAEC	1	Male	66
hSAEC	2	Male	37
hSAEC	3	Female	56

Donor information for hBEC and hSAECs. Shown for each cell type is lot number (Lot #), Sex, and Age (in years).
