

Supp. Figure 2. Effect of Me-Indoxam and RO092906A on fMLF-induced sPLA2 release from PMNs. The Cells were pre-incubated (37°C, 15 min) with or without Me-Indoxam and RO092906A (0.1 μ M), and then stimulated (37°C, 10 min) with fMLF (50 nM). VEGF-A_{165b} (A) and CXCL8/IL-8 (B) release was determined by ELISA. Data are the mean \pm SD of six different preparations of PMNs. * p <0.05 vs. respective control. § p <0.05 vs. hGV alone.
