

Supplementary Figure S1. Cumulative dose response of angiogenin on basal (control) and hormone stimulated (+FSH+IGF1) estradiol and progesterone production by small-follicle granulosa cells. Within treatment and panel, asterisk (*) indicates mean differs ($P < 0.05$) from 0 ng/ml dose.

Supplementary Figure S2. Cumulative dose response of angiogenin on basal (control) and hormone stimulated (+LH+IGF1) androstenedione and progesterone production by large-follicle theca cells. Within treatment and panel, asterisk (*) indicates mean differs ($P < 0.05$) from 0 ng/ml dose.
