

## S3 Fig

A

B

**S3 Fig. Cellular toxicity of DCA treatment in ONS-76, ONS-F8, and ONS-B11 cells.** (A) Ratio of PI-positive (dead) cells by flow cytometry, (B) Cell survival ratio after DCA treatment by clonogenic survival assay. Cells were treated with 50 mM DCA for 48 h. All quantitative data are means  $\pm$  S.D. \* $P < 0.05$ , Welch's t-test, n.s., non-significant.
