Fig. S1. *Pseudomonas* species comparative genomics. Average Nucleotide Identity (ANI) analysis and clustering were performed using PyANI (Richter M & Rossello-Mora R, PNAS 2009, 106 (45): 19126-31, and https://github.com/widdowquinn/pyani) of *Pseudomonas* isolate LPH1 and twelve closely related *Pseudomonas* species. Ppseudo, *Pseudomonas pseudoalcaligenes*; Ps_LPH1, *Pseudomonas* isolate described in this paper; Pmen, *Pseudomonas mendocina*.
