

Supplementary Fig. 1. Cigarette smoke induces KSRP expression. **A.** KSRP expression in human lung tissue specimens from non-smokers (n=4) and smokers (n=5) were determined by immunoblotting using anti-KSRP antibodies. *, $p < 0.05$, *t*-test. **B.** KSRP expression in the lungs of mice exposed to filtered room air (RA, n=3) or cigarette smoke (CS, n=5) for 6 months were determined by immunoblotting using anti-KSRP antibodies. *, $p < 0.05$, *t*-test. **C.** KSRP expression in the cell lysates of human non-transformed bronchial epithelial cells (Beas2B) exposed to cigarette smoke condensate (CSC) were determined by immunoblotting using anti-KSRP antibodies. *, $p < 0.05$, *t*-test.
