Precursor-cell lymphoid leukaemia (ICCC-3 Ia1) - Five-year net survival (NS, %) by age group and sex: continent, country and calendar period of diagnosis

Net survival estimates by sex were age-standardised where possible. Estimates in italics are not age-standardised

* National coverage – the data are derived from a population-based cancer registry (registries) covering the entire country

[M] Estimate based on merging data for 2 (or all 3) calendar periods

[R] Age-standardised estimate computed by pooling two age-specific estimates and re-estimation

[§] Estimate judged as less reliable

Acute myeloid leukaemia (ICCC-3 Ib) - Five-year net survival (NS, %) by age group and sex: continent, country and calendar period of diagnosis

Net survival estimates by sex were age-standardised where possible. Estimates in italics are not age-standardised

* National coverage – the data are derived from a population-based cancer registry (registries) covering the entire country

[M] Estimate based on merging data for 2 (or all 3) calendar periods

[R] Age-standardised estimate computed by pooling two age-specific estimates and re-estimation

[§] Estimate judged as less reliable
