

Figure S1. EAE disease course in female and male (A)DR*1501-Tg and (B) C57BL/6 mice, immunized with mMOG-35-55 peptide.

Female DR*1501-Tg mice

Figure S2. Days 20 and 63 p.i. spinal cord lumbar sections from EAE female DR*1501-Tg mice were stained with luxol fast blue (LFB) and analyzed for demyelination, Toluidine blue for spinal cord damage and CD4⁺ cells frequency in spinal cords of RTL342M vs. vehicle treated mice.
