**A. BAG4, IL6ST, VWF, EGFR**

B. BAG4, IL6ST, VWF, CD44

Supplementary figure 3. Panel significance for different colon cancer sites in the CHS pre-diagnostic sample set. Case predictive index of the four protein panels and the four proteins plus EGFR or CD44 sialyl Lewis-A and -X supplemented panels were plotted based on the colon cancer diagnosis sites. P: proximal colon cancer, D: distal colon cancer, R: rectal cancer.
Statistical significance: ***, $p<0.001$; ****, $p<0.0001$.
