

**Supplementary Figure S1** Mice response to HSA does not change due to RIT immunization. IgG titer against carrier protein anti-HSA in mice that were immunized with either 0.2%HSA, LMB-T20+0.2%HSA or SS1P+0.2%HSA. **(a)** Before immunization, **(b)** After 2 weeks of weekly immunizations, **(c)** After five immunizations, **(d)** After six immunization.

**Supplementary Table S1 Amino acid sequence of peptides used in alanine scan**

| Peptide name    | Amino acid sequence  |
