

Supplementary Figure 5

Supplementary Figure 5 – The correlation between miR-424-5p and SOCS2 in OSCC cell lines. **A:** qRT-PCR analysis to validate the expression levels of miR-424-5p in OSCC cell lines. The RUN44 small nuclear RNA was used as an internal normalized control. **B:** qRT-PCR analysis to validate the expression levels of SOCS2 in OSCC cell lines. GAPDH was used as an internal control. **C:** The linear correlation between the miR-424-5p and the SOCS2 level.
