Vol. 59: 873-878. 1977

Pearcy, Robert W., Joseph A. Berry, and David C. Fork. Effects of Growth Temperature on the Thermal Stability of the Photosynthetic Apparatus of *Atriplex lentiformis* (Torr.) Wats.

Page 875, column 2, Figure 4 legend should be corrected to read: Light dependence of CO₂ uptake at low intensities before (●) and after (○) heat treatment at 47 C for *A. lentiformis* grown at 43 C day/30 C night temperatures. Both curves were determined at 27 C.

Page 876, column 2, Figure 6 ordinate should be corrected to read: DCPIP reduction, $\mu\text{mol mg Chl}^{-1} \text{ hr}^{-1}$
