

**Manuscript title: MiR-2425-5p targets RAD9A and MYOG to regulate the proliferation and differentiation of bovine skeletal muscle-derived satellite cells**

**Authors:** Hui Li Tong, Run Ying Jiang, Wei Wei Zhang, Yun Qin Yan

**ID:** SREP-16-28588A (B)

**Information note:** We used polyclonal antibodies in our experiment. So you can see several blots in some WB graphs. Sometimes you can also see only one blot in some WB graphs because we cropped the NC membranes in WB process with the needs of experiments.
