Supplementary Table S4. Pair-wise comparisons between sample sources (SML, breath, controls) by analysis of similarity (ANOSIM) and permutational analysis of variance (PERMANOVA) results of detected microbes.

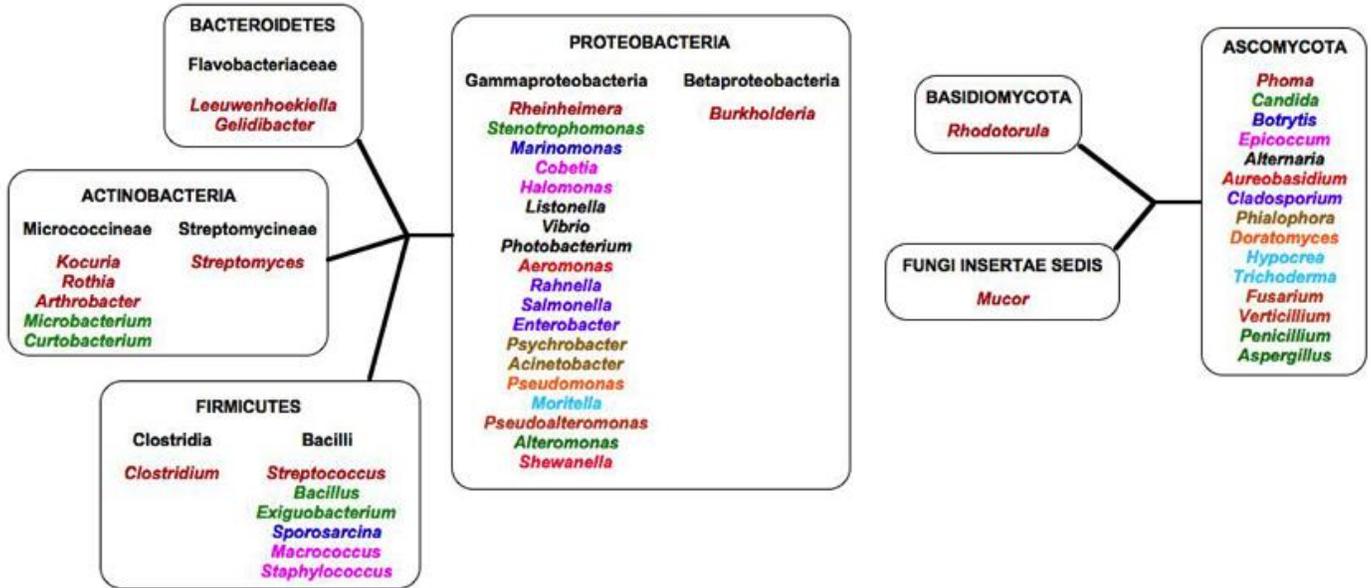

Years	Comparison	ANOSIM R	ANOSIM significance (%)	PERMANOVA t	p (perm)
<b>All years</b>	Breath vs SML	0.202	0.1	2.5952	0.001
	Breath vs controls	0.057	18.8	1.0865	0.275
	SML vs controls	0.221	0.2	1.9314	0.001
<b>2006</b>	Breath vs SML	0.015	37.4	1.3224	0.098
	Breath vs controls	0.135	27.5	1.1702	0.181
	SML vs controls	0.007	43.0	1.174	0.207
<b>2007</b>	Breath vs SML	0.781	0.1	2.9261	0.001
	Breath vs controls	-0.069	69.1	1.1698	0.166
	SML vs controls	0.918	0.1	2.9774	0.002
<b>2008</b>	Breath vs SML	0.906	0.2	2.8642	0.003
	Breath vs controls	0.000	46.7	1.338	0.218
	SML vs controls	0.892	1.1	2.4308	0.009
<b>2009</b>	Breath vs SML	0.226	2.5	2.1696	0.002
	Breath vs controls	0.46	2.4	1.252	0.074
	SML vs controls	0.384	0.3	1.7518	0.017

Supplementary Table S5. Pair-wise analysis of similarity (ANOSIM) R values for breath and control samples by year. R values range from 1 (no similarity between groups) to -1 (complete similarity between groups). Values in bold have a significance value < 0.05).

	2006, breath	2006, control	2007, breath	2007, control	2008, breath	2008, control	2009, breath	2009, control
2006, breath								
2006, control	0.135							
2007, breath	-0.090	-0.122						
2007, control	0.098	0.231	-0.069					
2008, breath	<b>0.520</b>	<b>0.843</b>	0.197	<b>0.613</b>				
2008, control	0.370	0.583	0.070	0.491	0.000			
2009, breath	<b>0.367</b>	<b>0.827</b>	<b>0.244</b>	<b>0.621</b>	<b>1.000</b>	<b>1.000</b>		
2009, control	<b>0.534</b>	0.944	<b>0.621</b>	0.333	<b>1.000</b>	1.000	<b>0.46</b>	

Supplementary Table S6. Bray-Curtis matrix for exhaled breath, sea surface microlayer (SML), and corresponding control samples used in microbial community analyses.

Supplementary Figure S1. Taxonomics of identified microbes in SRKW breath and SML.

Supplementary Figure S2. Sampling exhaled breath from SRKW. (A) Petri dishes mounted on extensible pole, showing lids in place to maintain sterility. (B) Position of pole with petri dishes to collect exhaled whale breath.

Supplementary Figure S3. Demonstration of SML sampling, showing scientist using a silicone squeegee (left hand) to direct water into plastic funnel from glass plate mounted on suction cup grip (right hand). Glass plate is repeatedly placed on surface to collect SML until target volume is obtained.
