Alignment of the C-terminal region of a partial list of hypothetical PilT sequences. The following sequences were aligned (organism (strain) accession number): *Aeromonas hydrophila* AAQ95749, *Azotobacter vinelandii* ZP_00089979, *Bordetella bronchiseptica* CAE31290, *Clostridium acetobutylicum* NP_348316, *Clostridium botulinum*, *Clostridium difficile*, *Clostridium perfringens* (str.13) BAB81473, *Clostridium thermocellum* (ATCC 27405) ZP_00314371, *Chromobacterium violaceum* (ATCC 12472) AAQ57858, *Desulfitobacterium hafniense* ZP_00097939, *Erwinia carotovora* (CAG76524), *Escherichia coli* (K12) AAC75987, *Geobacter metallireducens* ZP_00079672, *Gloeobacter violaceus* BAC90607, *Magnetococcus* sp. (MC-1) ZP_00044146, *Microbulbifer degradans* (2-40) ZP_00316306.1, *Nitrosomonas europaea* (ATCC 19718) NP_841038, *Nostoc punctiforme* ZP_00111977, *Pseudomonas fluorescens* (PfO-1) ZP_00264682, *Pseudomonas putida* (KT2440) NP_747194, *Pseudomonas syringae* pv. *syringae* (B728a) ZP_00125143, *Ralstonia metallidurans* (CH34) ZP_00272985, *Salmonella bongori*, *Shewanella oneidensis* (MR-1) NP_718905, *Salmonella* serovar Typhimurium (LT2) NP_462015, *Trichodesmium erythraeum* (IMS101) ZP_00072816, *Thermosynechococcus elongatus* (BP-1) NP_680912, *Thermotoga maritima* (MSB8) NP_229163, *Thermoanaerobacter tengcongensis* NP_622883, *Vibrio cholerae* (O1 biovar eltor str. N16961) NP_230116, *Vibrio parahaemolyticus* (RIMD 2210633) NP_798994, *Vibrio vulnificus* (CMCP6) NP_760425, *Wolinella succinogenes* NP_906769, *Xanthomonas axonopodis* (pv. citri str. 306) NP_643233, *Xylella fastidiosa* (Dixon) ZP_00039233. Sequences without accession numbers were obtained from the Sanger Institute website (www.sanger.ac.uk). Sequences were included in the alignment (Clustal W) if they possessed an AIRNLIRE-like motif with greater than 50% identity to the AIRNLIRE consensus sequence. The amino acids of the AIRNLIRE region are shaded black if they are identical in over half of the sequences or grey if they are similar. A consensus sequence is indicated above the alignment, and truncated sequences are marked by asterisks.
