

Supplementary Table SVI Associations of demographic variables with probability of transition from high tryer directly to pregnant.

Model	Demographic subgroup	TTx* (95% CI)
High tryer to pregnant	<25 years	1.00 (referent)
	25 to <30 years	0.94 (0.34,2.57)
	30 to <35 years	0.73 (0.28,1.91)
	≥35 years	2.11 (0.72,6.17)
	Currently married	1.00 (referent)
	Not currently married	2.72 (1.08,6.83)
	Non-Hispanic White	1.00 (referent)
	Hispanic	1.37 (0.52,3.60)
	Black	1.71 (0.40,7.26)
	Asian	2.10 (0.64,6.86)
	Other	2.57 (0.46,14.32)

* TTx = Fold change in time to transition relative to reference group.
