

PLCE1 polymorphisms and expression combined with serum AFP level predicts survival of HBV-related hepatocellular carcinoma patients after hepatectomy

SUPPLEMENTARY MATERIALS

SUPPLEMENTARY FIGURES

Supplementary Figure 1: Sequencing map for genotypes of PLCE1 rs2274223 polymorphism. The arrows in ①–③ show AA, AG, and GG genotypes, respectively

Supplementary Figure 2: Sequencing map for genotypes of PLCE1 rs376524 polymorphism. The arrows in ①–③ show CC, CT, and TT genotypes, respectively.
