

Three Supporting Figures.

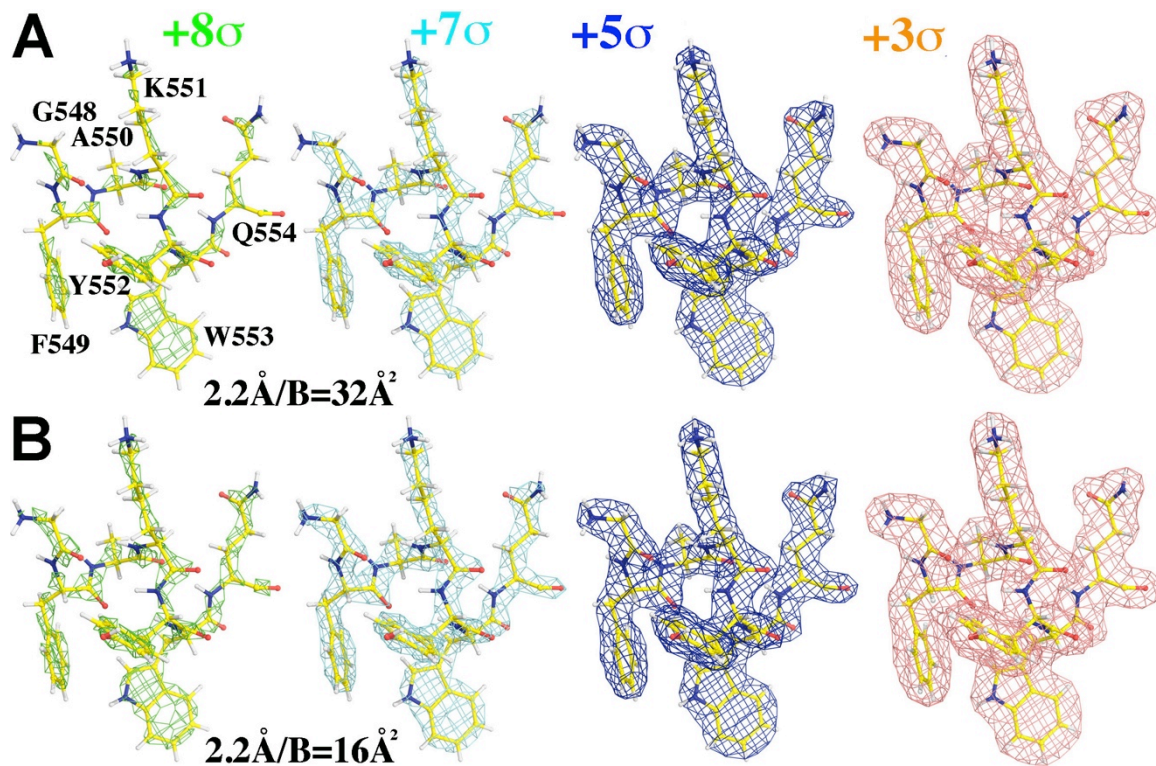

Figure S1. Simulated ESP map using neutral atomic models with $B=32\text{\AA}^2$ (A) or $B=16\text{\AA}^2$ (B) contoured at $+8.0\sigma$ (green) as well as three contour levels used in Figure 2, namely, $+7\sigma$ (cyan), $+5.0\sigma$ (blue), and $+3.0\sigma$ (salmon).

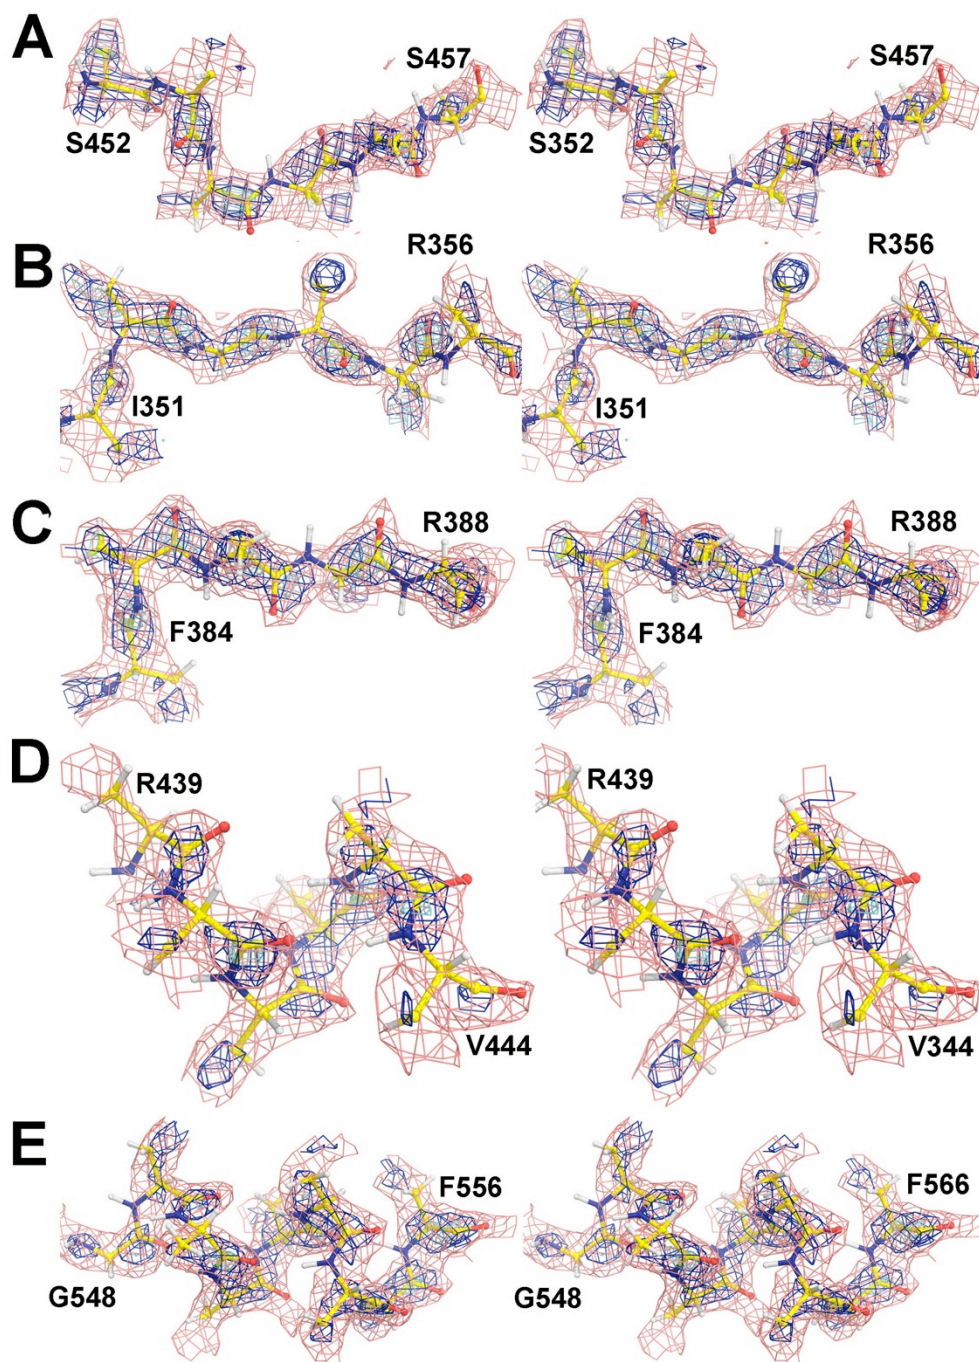

Figure S2. Sreodiagram continued from Figure 2 in three contour levels (+7 σ , cyan; +5 σ , blue, and +3 σ , salmon)

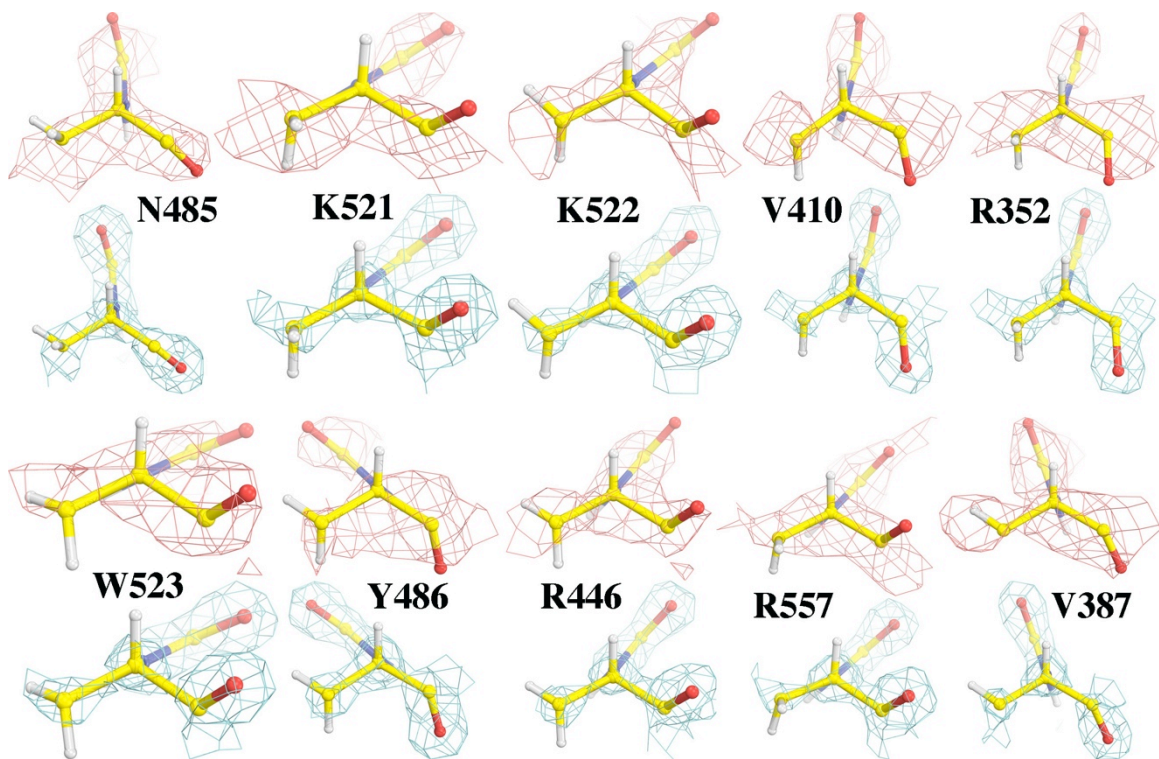

Figure S3. Continued from Figure 2.
