

Appendix: Prenatal antidepressant exposure and the risk of attention-deficit hyperactivity disorder: A population based cohort study

Contents

Supplementary material 1: Treatment utilisation of antidepressants and antipsychotics in the cohort

Supplementary material 2: Treatment continuation and switching pattern in the cohort

Supplementary material 3: Sensitivity analysis of including children born after 2009

Supplementary material 4: Sensitivity analysis of extending exposure period

Supplementary material 5: Sensitivity analysis of excluding children with ADHD medication but no ADHD diagnosis

Supplementary material 6: Sensitivity analysis of including the first pregnancy only

Supplementary material 7: Sensitivity analysis: start of follow-up at 5 years old

Supplementary material 8: Sensitivity analysis: adjust maternal depression, anxiety and substance abuse only

Supplementary material 9: Comparisons of antidepressant exposure rate

Supplementary material 1: Treatment utilisation of antidepressants and antipsychotics in the cohort

Period	SSRI ^a only	Other antidepressant only	Antipsychotic only	SSRI and other antidepressant	SSRI and antipsychotic	Other antidepressant and antipsychotic	All ^b	Non-exposed
Before Pregnancy	553	849	475	360	171	155	187	187,868
During Pregnancy	425	470	364	129	101	91	36	189,002
1st Trimester	324	294	298	58	86	69	14	189,475
2nd Trimester	235	273	280	49	55	59	13	189,654
3rd Trimester	250	320	298	38	56	56	8	189,592

^aSSRI= Selective serotonin re-uptake inhibitor.

^bPatients exposed to SSRI, other antidepressants and antipsychotics in that period.

Supplementary material 2: Treatment continuation and switching pattern in the cohort

During pregnancy	SSRI only	Other antidepressant only	Antipsychotic only	SSRI and other antidepressant	SSRI and antipsychotic	Other antidepressant and antipsychotic	All
Discontinued ^a	367	667	234	185	77	76	58
Continued ^b	144	156	231	42	42	32	13
New user	155	217	77	38	19	17	7
Switched to other regimen	42	26	10	133	52	47	116
Switched from other regimen	126	97	56	49	40	42	16

^aPatients who were on that treatment regimen before pregnancy and stopped before pregnancy started.

^bPatients who were on that treatment regimen before pregnancy and continued when pregnancy started.

Supplementary material 3: Sensitivity analysis of including children born after 2009

Exposure	Crude estimate			Model 1 ^a			Model 2 ^b			Model 3 ^c		
	HR	95%CI	p-value	HR ^d	95%CI ^e	p-value	HR	95%CI	p-value	HR	95%CI	p-value
Antidepressants (Included children born after 2009)												
During Pregnancy	2.21	1.76	2.78	<0.01	2.33	1.85	2.94	<0.01	1.33	1.03	1.73	0.03
