

SUPPLEMENTARY FIG. S11. Functional role of cofilin in TSP1-induced macropinocytosis. (A) Gene silencing of cofilin. (B, C) Control and cofilin-silenced macrophages were incubated with FITC-dextran, treated with vehicle or TSP1 (10 nM, 4 h), and FACS performed ($n=3$). * $p < 0.05$ versus vehicle. Data represent the mean \pm SD.
