

SUPPLEMENTARY FIG. S4. TSP1 does not change ACAT and NCEH-1 expression in macrophages. Macrophages were incubated with vehicle or TSP1 (10 nM) for 1, 4, 8, 16, or 24 h. ACAT protein (Abcam) (A) and NCEH-1 mRNA expression (Bio-Rad) (B) was determined by Western blot and RT-PCR, respectively ($n=3$). Data represent the mean \pm SD. ACAT, acyl-CoA:cholesterol O-acyltransferase.
