

SUPPLEMENTARY FIG. S6. TSP1 does not stimulate extracellular $O_2^{\bullet-}$ generation in macrophages. Macrophages were incubated with vehicle or TSP1 (10 nM) for 60 min. Extracellular $O_2^{\bullet-}$ generation was detected by the membrane-impermeant EPR spin probe PPH ($n=3$). EPR, electron paramagnetic resonance; PPH, 1-hydroxy-4-phosphono-oxy-2,2,6,6-tetramethyl-piperidine.
