Supplementary Figure 3. High *DPP3* mRNA expression correlates with poor relapse-free survival (RFS) of breast cancer patients in the Kaplan-Meier Plotter database. (**A**-**F**) Kaplan-Meier (KM) plots comparing RFS of patients based on high (upper half) versus low (lower half) *DPP3* mRNA expression in (**A** and **D**) all tumors, (**B** and **E**) ER+ tumors, or (**C** and **F**) ER-tumors. The correlation curves were generated using the Kaplan-Meier Plotter web portal (http://kmplot.com/). DPP3 mRNA expression was determined using probe 232510_s_at (**A**-**C**) or 218567_x_at (**D**-**F**), respectively.
