

**Supplemental Figure S1**

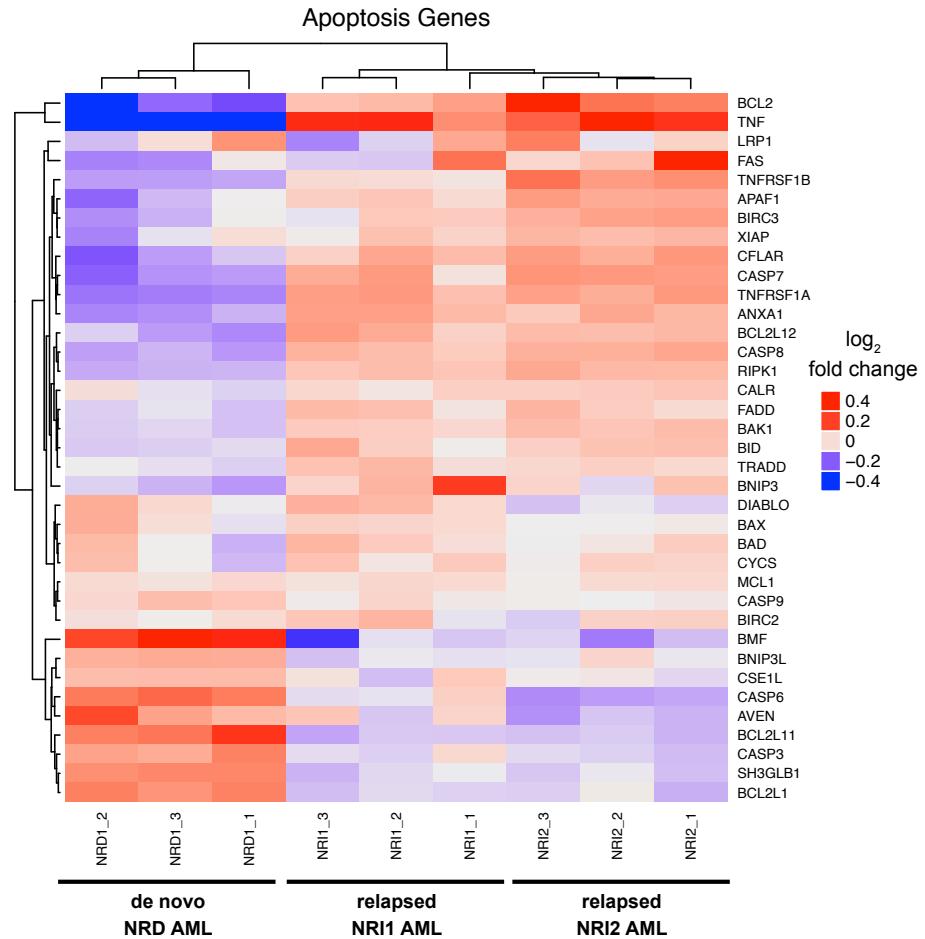

**Supplemental Figure S1. Expression of BCL2 and BCL-xL proteins in *de novo* NRD and relapsed NRI AMLs by Western blotting.** Western blotting for BCL2 (top) and BCL-xL (bottom) protein levels in splenocytes from leukemic mice with untreated NRD AML, 72 hour Dox treated NRD AML, NRI1 AML, or NRI2 AML. Corresponding GAPDH loading control and GAPDH-normalized quantitation of BCL2 or BCL-xL expression levels are shown.

## Supplemental Figure S2

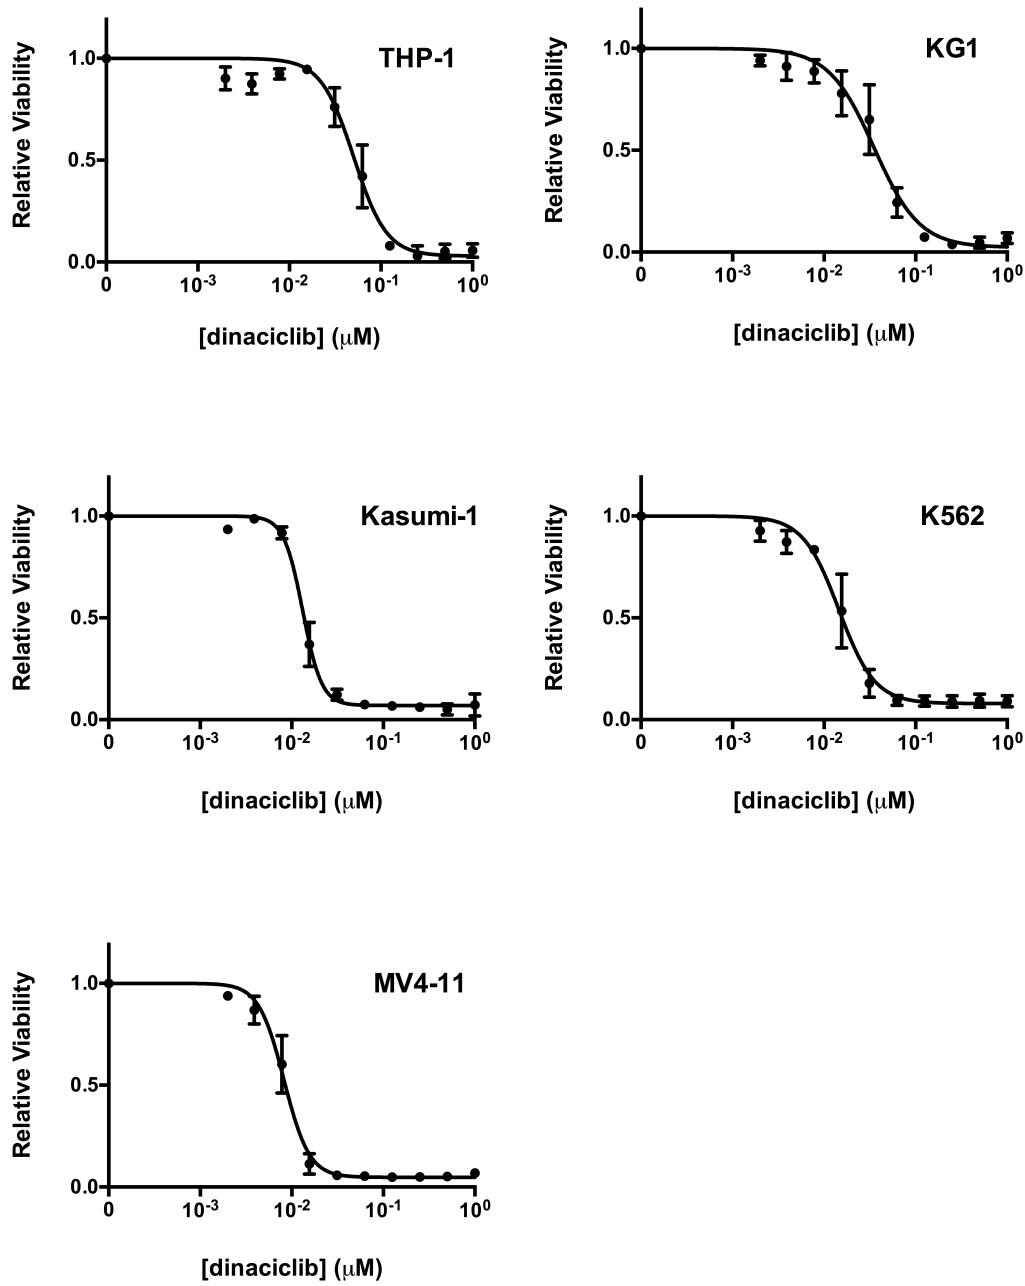

**Supplemental Figure S2. Analysis of cancer signaling pathways in *de novo* NRD and relapsed NRI AMLs using flow cytometry.** Flow cytometry analysis of signaling through cancer signaling pathways in splenocytes harvested from leukemic mice with untreated NRD AML (red shaded histograms), 72 hour Dox treated NRD AML (red open histograms), NRI1 AML (green open), or NRI2 AML (blue open). All mice with NRI AMLs were maintained on Dox to suppress NRAS(V12) expression.

### Supplemental Figure S3

**Supplemental Figure S3. Differential expression of apoptosis-associated transcripts between *de novo* NRD and relapsed NRI AMLs.** Heatmap for differential apoptosis-associated transcript levels between splenocytes from leukemic mice with *de novo* NRD AML after 72 hours of Dox treatment and relapsed NRI1 and NRI2 AMLs ( $n = 3$  independent mice per group, differential expression defined as Benjamini-Hochberg corrected  $q$ -value of  $\leq 0.01$  and  $\geq 1.5$  fold change). All mice with NRI AMLs were maintained on Dox to suppress NRAS(V12) expression.

**Supplemental Figure S4**

**Supplemental Figure S4. Dinaciclib potently reduces viable cell numbers of genetically diverse human AML cell lines.** MTS analysis of viable AML cell numbers 72 hours after dinaciclib treatment ( $n = 3-5$  independent experiments, error bars = standard error of the mean).

**Table S1. Normalized RPPA Data.**

| Antibody Name      | Gene Name | normalized log2 signal |         |         |         |         |         |         |         |         |
|--------------------|-----------|------------------------|---------|---------|---------|---------|---------|---------|---------|---------|
