Supplementary information
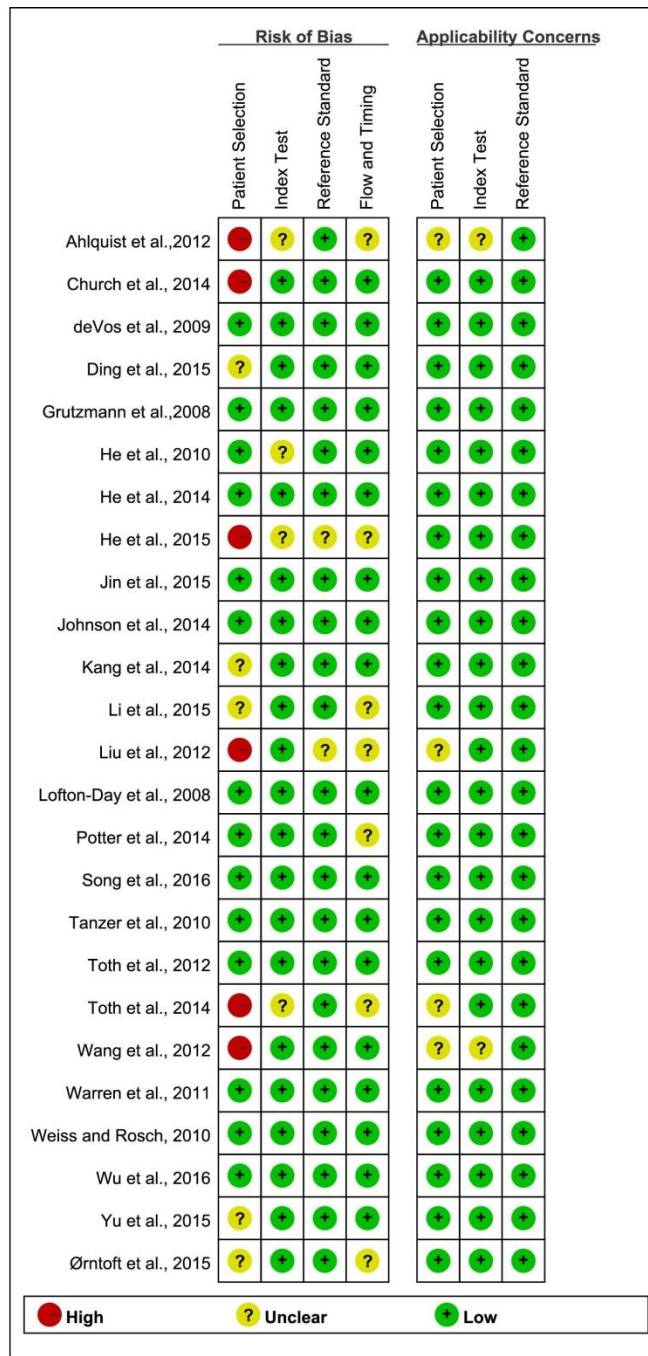

Supplementary Figure 1. Summary of quality of the included studies, according to the guidelines of quality assessment of diagnostic accuracy studies (QUADAS) criteria [8].
Supplementary Figure 2. Forest plot and estimated sensitivity and specificity for CRC detection with CEA with 95% confidence interval.

Supplementary Figure 3. Forest plot and estimated sensitivity and specificity for CRC detection with CA50 with 95% confidence interval.
Supplementary Figure 4. Forest plot and estimated sensitivity and specificity for CRC detection with CA242 with 95% confidence interval.

Supplementary Figure 5. Forest plot and estimated sensitivity and specificity for CRC detection with CA724 with 95% confidence interval.

Supplementary Figure 6. Forest plot and estimated sensitivity and specificity for CRC detection with CA199 with 95% confidence interval.
