**Supplementary Figures SF1-4.** The phylogenetic relationships of 17 Orthotrichaceae species based on partitioned mitogenomic datasets: SF1-AllCDS – dataset based on all protein-coding sequences, SF1-20CDS dataset based on 20 most variable sequenced; SF3-AllNC – dataset based on all non-coding regions; SF4-20NC – dataset based on the 20 most variable non-coding regions. The bootstrap values (ML) are given at nodes. The nodes with underlined bootstrap values are not supported by BI analyses (posterior probabilities lower than 0.95).
