## Supplementary Information

**Supplementary Fig. S1.** Immunofluorescent images of collagen secretion from HPMC.

(A) Confocal images of collagen secretion in HPMCs with or without TGF- $\beta$  stimulation.

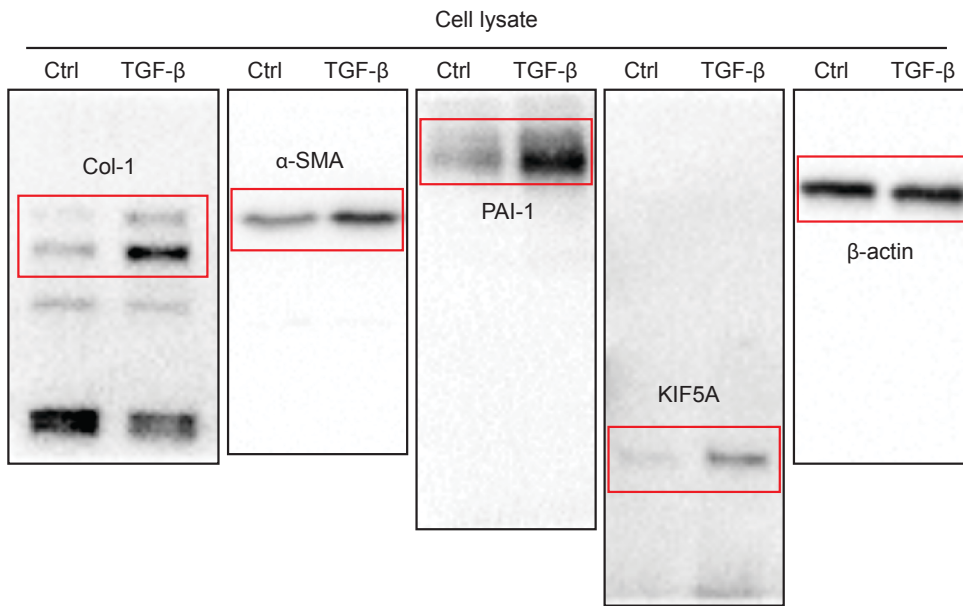

White dotted lines indicate the edge of cells. White arrowheads represent secreted collagen

in outside of cells. Scale bar; 40  $\mu$ m. (B) Effect of KIF5A KD on collagen secretion of

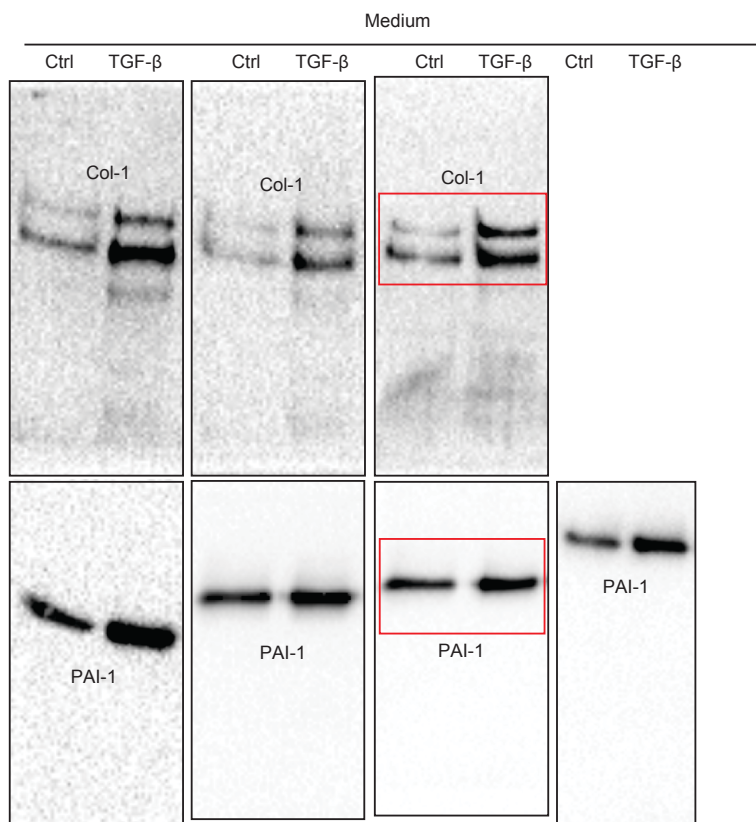

HPMCs treated with control siRNA and KIF5A siRNA after TGF- $\beta$  stimulation. White dotted

lines indicate the edge of cells. White arrowheads represent secreted collagen in outside of

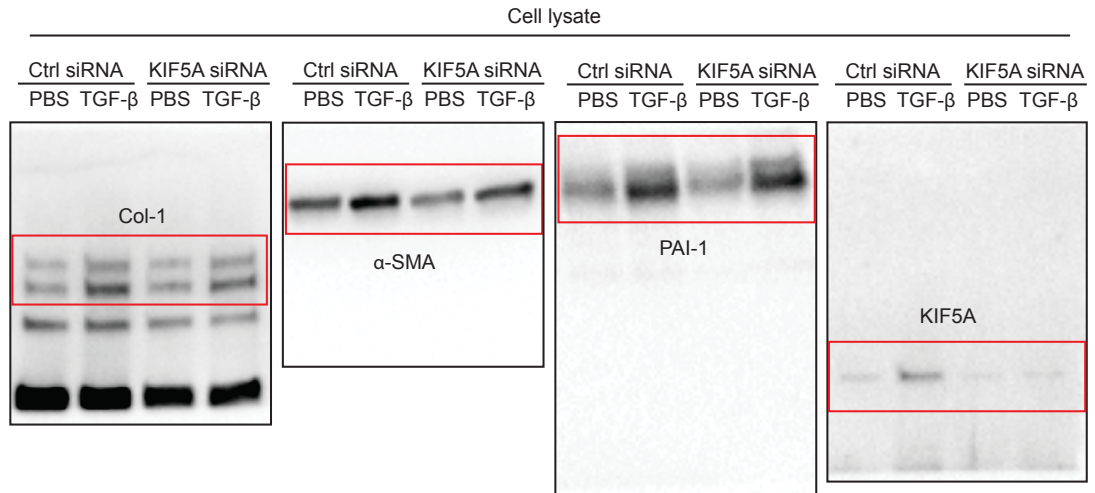

cells. Scale bar; 40  $\mu$ m.
