

Prevalence of overweight and obesity in 15.8 million men aged 15-49 years in rural China: a population-based, cross-sectional study from 2010 to 2014

Yuan He, An Pan, Yuanyuan Wang, Ying Yang, Jihong Xu, Ya Zhang, Dujia Liu, Qiaomei Wang, Haiping Shen, Yiping Zhang, Donghai Yan, Zuoqi Peng, Frank B. Hu, Xu Ma

Online Supplemental Material

The following materials are included in the Online Supplemental Material.

1. Supplemental Table S1.
2. Supplemental Table S2.
3. Supplemental Figure S1.

Supplemental Table S1. Sample sizes and weighted proportion of demographic characteristics of women in rural China between 2010 and 2014.

Supplemental Table S2. Prevalence and trends of overweight and obesity according to the WHO criteria for reproductive-age men aged 15-49 years in rural China, 2010-2014

Supplemental Figure S1. Trends in prevalence of overweight and obesity among men and their female partners before conception, 2010-2014.

Figure legends: Overweight and obesity were defined according to the Chinese criteria: overweight, $24.0 \leq \text{BMI} \leq 27.9 \text{ kg/m}^2$ and obesity, $\text{BMI} \geq 28.0 \text{ kg/m}^2$; Couples: those with at least one of them being overweight or obese.

Supplemental Table S1. Sample sizes and weighted proportion of demographic characteristics of reproductive women in rural China between 2010 and 2014.^a

	N	percentage
