

Supplementary Data

^aIn MEM-MD-57A Part 2 MMRM approach based on observed cases were performed, and in MEM-MD-67 only descriptive statistics were analyzed. Therefore, the presented scores are least squares means from the MMRM model for MEM-MD-57A Part 2 and ordinary means for MEM-MD-67. ITT, intention-to-treat; Mem, extended-release memantine; MMRM, mixed-effect model repeated measures; Pbo, placebo; SEM, standard error of the mean.

SUPPLEMENTARY FIG. S1. Post-Baseline Scores on Core Autism Treatment Scale-Improvement (CATS-I) (Autism ITT Population)^a
