SUPPLEMENTARY VIDEO LEGENDS

Supplementary Movie 1. TIMP-1 intrinsic dynamics along the modes 7, 8 and 9. The displacements of the TIMP-1 backbone along the first three modes (Mode 7, Mode 8 and Mode 9) calculated by NMA are visualized.

SUPPLEMENTARY FIGURES

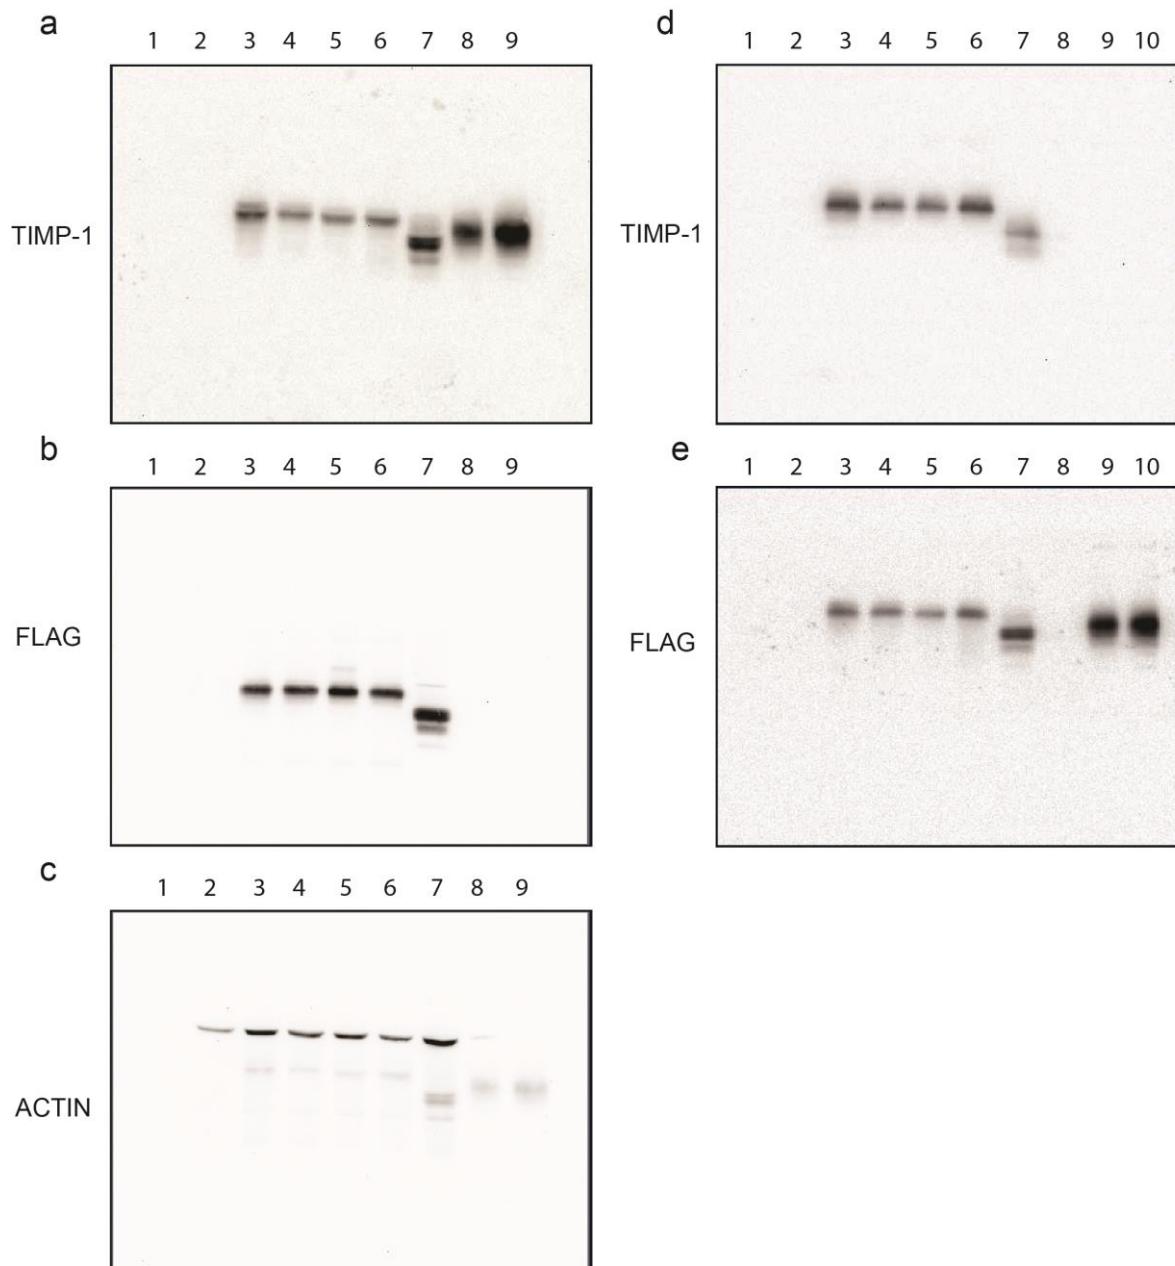

Figure S1: Complete blots with the indicated antibodies presented in the figure 4 of the manuscript. Panel **a**, **b** and **c** correspond to blots of cell-extracts and panel **d** and **e** correspond to blots of conditioned medium. For the panel **a**, **b** and **c**: lane 1- PageRuler Prestained Protein Ladder; 2- cell extract of non-transfected CHO cells; 3- cell extract of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-T2G (mutant unpresented in this manuscript); 4- cell extract of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-WT; 5- cell extract of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-F12A; 6- cell extract of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-K47A; 7- cell extract of CHO cells transfected with p3X-FLAG-CMV-14 expressing N-TIMP-1 (N-terminal domain of TIMP-1: AA 1 to 125); 8- 10 ng of Recombinant TIMP-1 (Merck Millipore); 9- 50

ng of Recombinant TIMP-1. For the panel **d** and **e**: lane 1- PageRuler Prestained Protein Ladder; 2- Conditioned medium of non-transfected CHO cells; 3- Conditioned medium of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-T2G (mutant unpresented in this manuscript); 4- Conditioned medium of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-WT; 5- Conditioned medium of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-F12A; 6- Conditioned medium of CHO cells transfected with p3X-FLAG-CMV-14 expressing T1-K47A; 7- Conditioned medium of CHO cells transfected with p3X-FLAG-CMV-14 expressing N-TIMP-1 (N-terminal domain of TIMP-1: AA 1 to 125); 9- 10 ng of Recombinant TIMP-1; 10- 50 ng of Recombinant TIMP-1
