

**S4 Fig.** Effects of esomeprazole (ESOM) pretreatment on cell viability and apoptosis with paclitaxel in SiHa and MS751 cells. ESOM pretreatment significantly enhanced the cytotoxicity of paclitaxel in SiHa (11%,  $p < 0.01$ ) and MS751 cells (18%,  $p < 0.01$ ) when compared with paclitaxel pretreatment. \* $p < 0.05$ .
