

Supplementary Table 1. Response rates of pain intensity and frequency questions of the OPAS.

PAIN INTENSITY QUESTIONS								
	EYE PAIN						NON-EYE PAIN	
	Most Eye Pain in the past 24h	Most Eye Pain in the past 2 wks	Least Eye Pain in the past 24h	Least Eye Pain in the past 2 wks	Average Eye Pain in the past 24h	Average Eye pain in the past 2 wks	Most Non-Eye Pain in the past 24h	Most Non-Eye Pain in the past 2 wks
N (attempted)	101	95	102	93	102	91	95	88
N (total)	102	102	102	102	102	102	102	102

PAIN FREQUENCY QUESTIONS				
	Frequency of Eye Pain in the past 24h	Frequency of Non-Eye Pain in the past 24h	Frequency of Eye Pain in the past 2 wks	Frequency of Non-Eye Pain in the past 2 wks
N (attempted)	41	22	48	23
N (total)	102	102	102	102

Supplementary Table 1. Response rates of pain intensity and frequency questions of the OPAS. All pain intensity questions had high response rates ranging from (86.3% to 100%), whereas the pain frequency questions had very low response rates (22.3% to 47.1%) suggestive of poor question design.
