9 October 2014

Dear Professor Ian Roberts,

HTA Project: 14/190/01 - The CRASH-3 Trial: Tranexamic acid for the treatment of significant traumatic brain injury

I am pleased to inform you that your above-titled proposal has been recommended for funding. Please would you inform your co-applicants of the decision.

You will shortly receive a task to provide sponsor signatures ready for the studies contract. Please log into your user account for the NETSCC Management Information System (NETSCC MIS) at <https://netscc-mis.nihr.ac.uk> to complete the 'Provide Final App Signatures' task. You will need to obtain final signatures to confirm that your supporting roles agree to any changes and support your application. Please note that co-applicants are not required to sign.

Please can you also email a clean copy of your final full project description as a pdf to htafwc@soton.ac.uk.

A member of the HTA Programme, Monitoring team will be contacting you soon to request key project information and to facilitate the timely start-up of your study.

Please note that this award is not secure until the work has been contracted. Therefore you must not publicise this award until you receive a completed contract from us.

After the contracts have been signed, the HTA Programme encourages successful applicants to consider submitting their protocols for review to journals.

Congratulations once again and we wish you all success with your project.

If you have any queries, please contact me on htafwc@soton.ac.uk. I look forward to receiving your response.

Yours sincerely,

Zoe Hurworth

The HTA Programme
