19 **Fig S3. Bar graph showing proportion of pups that followed and did not follow pointing**

20 **cues over the range of 4th week – 8th weeks.** No significant variation was found for point-

21 following behaviour of pups during the age range (Goodness of fit, $p = 0.405$). Black bars
22 indicate pups that followed point and grey bars indicate pups that did not follow the pointing cue.
