

| Cell line | O ₂ level | (IC ₅₀ -SE) – (IC ₅₀ +SE) |
|-----------|----------------------|---|
| PANC-1 | NO | < 1.5 |
| | HO | 2.17 – 2.72 |
| SNB-75 | NO | 2.24 – 2.73 |
| | HO | 1.83 – 2.49 |
| HELA | NO | 2.47 – 2.82 |
| | HO | 2.24 – 2.73 |
| PC-3 | NO | 2.51 - 2.76 |
| | HO | 2.86 - 2.91 |
| HI-LAPC-4 | NO | 2.66 – 2.80 |
| | HO | 1.95 – 2.06 |

Suppl Table 2. Cancer cells were treated with DPS for 4 hr under normoxia (NO) or hypoxia (HO), and the proliferation was measured by clonogenic assay. Data were analyzed by Sigmoidal dose-response modeling, and expressed as IC₅₀s with the range of standard error.
