

**Figure S6. m<sup>6</sup>A driven circRNA translation is more sensitive to treatment of hygromycin B.** 293 cells were transfected with circRNA reporters containing RSV sequence. The media was changed to fresh media with 0, 20, 50, 100μg/ml hygromycin after 6 hours. After 48hrs, the cells were collected, and RNA and protein expression were analyzed by RT-PCR and western blots.
