

**Fig. S1.** Map of forest cover (green), study sites (circles), and 50x50-km landscape blocks (grid cells) for eastern red-backed salamanders (*Plethodon cinereus*) sampled from 1880 to 2015 in North America. Symbol fill for study sites represents observed proportion of striped *P. cinereus*.

**Table S1.** Standardized coefficients for regressions and covariances in a path analysis model of *Plethodon cinereus* morph frequencies in landscape blocks at varying spatial scales (10 x 10 km, 50 x 50 km, 100 x 100 km) and when the minimum number of individuals (*n*) at each site is 20 (*N* = 1170 sites), 30 (*N* = 848 sites), 40 (*N* = 667 sites), and 50 (*N* = 574 sites). Bold indicates significant coefficients at *P* ≤ 0.05.

Spatial scale	Relationship	Variables	Standardized coefficients
