

Suppl Fig 2. *miR-210* expression level in HPFs. Monolayers of HPFs were serum starved for 24 h and then incubated for additional 24 h in hypoxic condition (i.e., 1 % O₂) or in normoxic condition. Total RNA was extracted and *miR-210* expression level was analyzed by qRT-PCR. Results are representative of three experiments with similar results. * p<0.005 normoxia vs hypoxia.
