

S3 Fig. Expression of hormone signaling genes in *sob3-6*.

Ten-day-old seedlings grown under long-day conditions (LDs) were harvested for total RNA isolation. Transcript accumulation of hormone marker genes (**A**) and auxin transport genes (**B**) was analyzed by RT-qPCR. The *eIF4a* gene (At3g13920) was used as an internal control. Biological triplicates were averaged and statistically analyzed by two-tailed Student's *t*-test assuming unequal variance ($*P < 0.05$). Bars indicate standard error of the mean.
