

S1 Fig. Power plots. Power for a) Baseline Lp-PLA2 activity in both placebo and darapladib arms ($n=23,000$) and Change from Baseline in darapladib arm ($n = 11,500$) at alpha = 5E-8; b) efficacy endpoints in both placebo and darapladib arms ($n = 23,000$) at alpha = 0.001 (candidate gene) and 5E-8 (GWAS) tolerability endpoints in darapladib arm only arms ($n = 11,500$) at alpha = 0.001 (candidate gene) and 5E-8 (GWAS).
