

Figure S1

Supplement Figure S1 Glycolysis is normal in *Per2*-null RBCs. (A) The activity of glycolysis rate limiting enzyme PK, PFK and HK in WT and *Per2*-null RBCs at ZT1 and ZT13. The mRNA expression of *Pk*, *Pfk* and *Hk* was detected in Ter119+ (B), Ter119-(C) and BM (D) of WT and *Per2*-null mice at ZT1 and ZT13. All data $X \pm \text{SEM}$; $n=6$ in each group, * $p < 0.05$, ** $p < 0.01$.
