

Table 3. Legend for supplementary data file.

Table Heading	Description
PatID	Unique code for individuals with visits included in the study
EpisodeNumber	1 = First visit for an individual 2 = Second visit for an individual
LUTName	Antibiotic prescription associated with visit, according to pharmacy records 1= Azithromycin 2= Gatifloxacin 3= Moxifloxacin 4= Penicillin V 5= Other Blank= None prescribed
PrescriptionMade	1= "LUTName" is 1, 2, 3, 4, or 5 2= "LUTName" is 0
PurulentNasalDrainage	Purulent nasal drainage (thick or discolored drainage)
PainTenderness	Maxillofacial sinus and/or tooth pain/tenderness (including reported frontal headache)
SinusSxs7days	Sinusitis-related symptom duration of greater than or equal to 7 days
Unilateral	Unilateral sinus-related symptoms (pain, tenderness or swelling)
Worseningafterimprovement	Worsening of sinus-related symptoms after initial improvement
Feverchillsnightsweats	New fever (subjective or objective[$\geq 37.8C/100F$]), chills or night sweats within the last 7 days
Sorethroat	Sore throat
Cough21	New cough of duration < 21 days
Cough7	New or changed cough within last 7 days
Sputum	New or changed sputum production within last 7 days
Dyspnea	New or changed dyspnea within last 7 days
Pleuriticchestpain	New or changed pleuritic chest pain within last 7 days
AntibioticPrescribed	1= Visit documentation indicates that an antibiotic was prescribed 0= Visit documentation does not indicate that an antibiotic was prescribed
AbxforOtherDx	1= Antibiotic explicitly prescribed for a non-ARI diagnosis 0= Antibiotic not explicitly prescribed for a non-ARI diagnosis
AcutePneumonia	1= Visit meets criteria for pneumonia 2= Visit does not meet criteria for pneumonia
AcuteSinusitis	1= Visit meets criteria for acute sinusitis 2= Visit does not meet criteria for acute sinusitis
AcuteBronchitis	1= Visit meets criteria for acute bronchitis 2= Visit does not meet criteria for acute bronchitis
ARIofInterest	1= Symptoms lead to a diagnosis of interest (pneumonia, sinusitis, bronchitis) 0= Symptoms do not lead to a diagnosis of interest
Appropriateness	1= Antibiotic prescription or non-prescription was appropriate based on the ARI treatment guidelines 0= Antibiotic prescription or non-prescription was not appropriate

	based on the ARI treatment guidelines
PrePost	1= Visit occurred before the date of change from gatifloxacin to moxifloxacin 0= Visit occurred after the date of change from gatifloxacin to moxifloxacin
Race	Patient race, self-reported. Options are: White Black or African American Asian Native Hawaiian or other Pacific Islander American Indian or Alaskan Native Unknown by patient Declined to answer
