

Supporting Information: Fig. S5

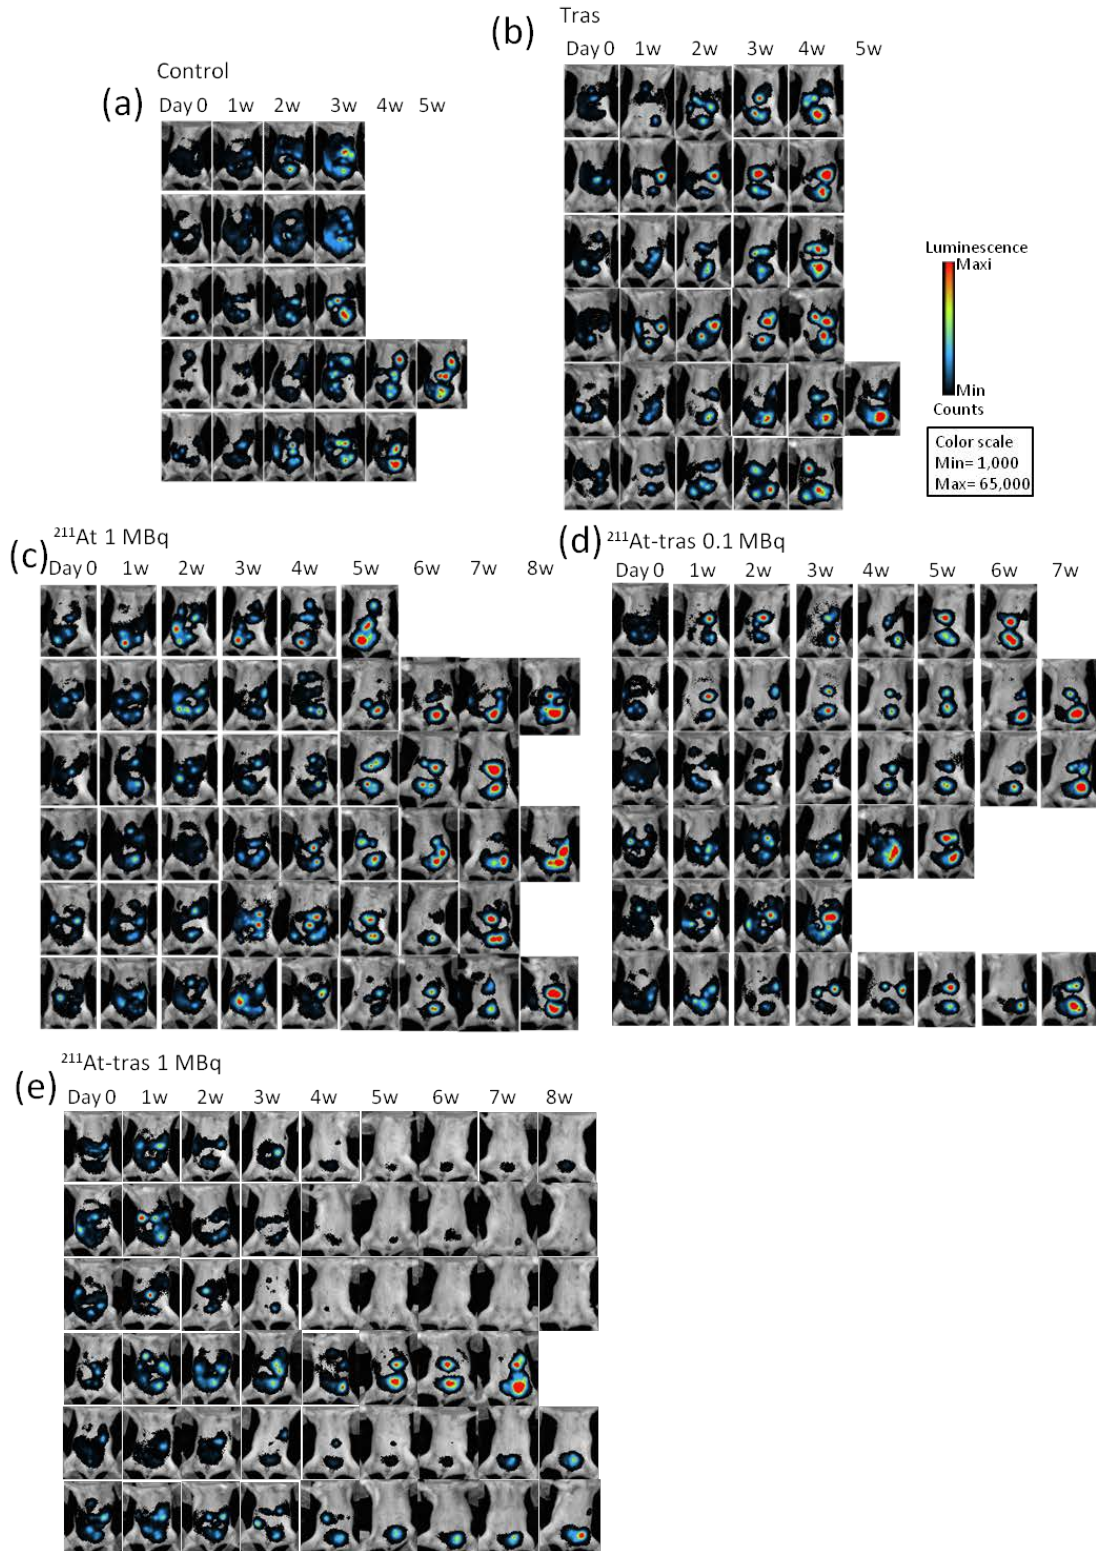

Fig. S5. Bioluminescence images of tumor growth in the mice of each group treated with (A) PBS (Control), (B) trastuzumab (Tras), (C) ^{211}At (1 MBq), or ^{211}At -trastuzumab [^{211}At -Tras; (D) 0.1 or (E) 1 MBq]. Images were taken the day before the treatment (Day 0) and at several time points after treatment. The mice shown in Figure 3 are included in this figure. The color scale indicates the bioluminescence intensity per pixel.
