

MATLAB Software to enable use of the statistical model is available at  
<https://sourceforge.net/projects/ncspline/>

## **ADDITIONAL RESOURCES**

None

## **SUPPLEMENTAL DATASETS**

**Dataset S1. Related to Figures 1 and 2 and STAR Methods section “Selected Reaction Monitoring Proteomics” (Attached as Excel spreadsheet). SRM parameters and intensities.** List of detected SRM transitions and intensities as measured by peak area integration in Skyline software. Transitions and raw intensities are compiled from 3 data sets, across 7 injections, before normalization with housekeeping proteins.

**Dataset S2. Related to Figures 1 and 2 and STAR Methods section “Ribosome profiling and mRNA-seq” (Attached as Excel spreadsheet). RPKM of genes monitored by ribosome profiling and mRNA seq and biological processes in Upreg and Downreg transcripts in response to bortezomib treatment.**

“MM1.S – DAVID analysis” sheet includes most enriched results from DAVID analysis (32) with default settings and human as species in MM1.S experiments. Top five most enriched terms shown measured from “Upreg” and “Downreg” clusters, as in Figure S2A.

**Dataset S3. Related to Figures 2 and 4 and STAR Methods section “Estimation of absolute protein copy number at baseline” (Attached as Excel spreadsheet).**

**iBAQ values.** MM1.S and EBV-immortalized B-cell tryptic peptide samples were analyzed using the iBAQ algorithm implemented in MaxQuant. For comparison to SRM and sequencing data, proteins were matched based both on UniProt identifier in MaxQuant protein group and gene name.

**Dataset S4. Related to Figures 2 and 4 and STAR Methods section “Prediction of translational rate parameters and protein synthesis rates using ribosome profiling and RNA-seq measurements” (Attached as Excel spreadsheet).**

**Master dataset used for model calculations in both MM1.S and EBV-immortalized B-cell experiments and estimation and prediction of translational rate parameter  $k_g^s(t)$  and protein synthesis rates in MM1.S experiments.**

Absolute protein abundance (SRM intensity scaled by baseline iBAQ values; all values baseline corrected for “heavy” channel intensity at 0h) and mRNA and ribosome footprint density mapping to gene across the time course. All the values in this dataset are the fitted values by functional data analysis. “MM1.S - estimation & prediction” sheet includes the Pearson correlation coefficient and relative mean absolute error (RMAE) of the estimation and prediction of translational rate parameter and protein synthesis rate averaged over all the genes were compared to those between the two mass spectrometry replicates We define the relative mean absolute error between two time series  $f_1$  ( $t$ ) and  $f_2$  ( $t$ ) as  $\frac{1}{T} \int_0^T |f_1$  ( $t$ ) –  $f_2$  ( $t$ ))|/| $f_2$  (0)|dt.

**KEY RESOURCES TABLE**

REAGENT or RESOURCE	SOURCE	IDENTIFIER
<b>Antibodies</b>		
Rabbit monoclonal anti-GAPDH	Cell Signaling Technology	Cat# 2118L
Rabbit monoclonal anti-vimentin	Cell Signaling Technology	Cat# 5741P
Rabbit polyclonal anti-Bid	Cell Signaling Technology	Cat# 2002P
Mouse monoclonal anit-puromycin	KeraFast	Cat# 3RH11
Rabbit monoclonal anti-4E-BP1	Cell Signaling Technology	Cat# 53H11
Rabbit monoclonal anti-phospho-4E-BP1 (T37/46)	Cell Signaling Technology	Cat# 236B4
<b>Chemicals, Peptides, and Recombinant Proteins</b>		
Bortezomib	LC Laboratories	B-1408
Cycloheximide	Sigma-Aldrich	Cat# C4859; CAS: 66-81-9
L-Lysine 4,4,5,5-D4 (Lys4)	Cambridge Isotope Laboratories	Cat# DLM-2640
L-Arginine <sup>13</sup> C <sub>6</sub> (Arg6)	Cambridge Isotope Laboratories	Cat# CLM-2265-H
L-Lysine <sup>13</sup> C <sub>6</sub> <sup>15</sup> N <sub>2</sub> (Lys8)	Cambridge Isotope Laboratories	Cat# CNLM-291-H
L-Lysine <sup>13</sup> C <sub>6</sub> <sup>15</sup> N <sub>4</sub> (Arg10)	Cambridge Isotope Laboratories	Cat# CNLM-593-H
L-Lysine	Sigma-Aldrich	Cat# 8662; CAS: 657-27-2
L-Arginine	Sigma-Aldrich	Cat# A6969; CAS: 1119-34-2
TRIzol® reagent	Life Technologies	Cat# 15596026
HALT protease and phosphatase inhibitor single use cocktail	Thermo Fisher	Cat# 78443
Sequencing Grade Modified Trypsin	Promega	Cat# V5111
GAPDH recombinant protein	Abcam	Cat# ab82633
Vimentin recombinant protein	PeptroTech	Cat# 110-10
Bid recombinant protein	Sino Biological	Cat# 10468-HNCE-59
<b>Critical Commercial Assays</b>		
Rneasy mini kit	QIAgen	Cat# 74104
Quantifluor RNA assay	Promega	Cat# E3310
Oligo(dT)25 Magnetic Beads kit	New England BioLabs	Cat# S1419S
Pierce™ BCA Protein Assay Kit	Thermo Fisher Scientific	Cat# 23225
SepPak C18 columns	Waters	Cat# WAT020515
CellTiter-Glo® Luminescent Cell Viability Assay	Promega	Cat# G7570
Caspase-Glo® 3/7 Assay Systems	Promega	Cat# G8090
Invitrogen MyOne streptavidin C1 dynabeads	Thermo Fisher	Cat# 65001
