

S2 Fig. The comparison of the effects of 4'-HW and wogonin on LPS-induced expression of pro-inflammatory cytokines (A) TNF- α , (B) IL-6, and (C) IL-1 β in RAW 264.7 macrophages. Cells were treated with 4'-HW or wogonin or parthenolide for 1 h prior to LPS stimulation (100 ng/mL, 4 h). The transcripts of TNF- α , IL-6 and IL-1 β were determined by quantitative real-time PCR. The data shown represent the mean \pm SD of three independent experiments. # p <0.05 vs the control group; * p <0.05 vs the LPS-treated group.
