^aYear of participation in the 12th grade Monitoring the Future (MTF) survey.

^bYear of participation in the noted modal age MTF follow-up survey. Respondents from each 12th grade high school cohort are randomly divided with half surveyed for longitudinal follow-up in odd-numbered years and half in even-numbered years. For example, half of the 2005 cohort was surveyed at age 25 in 2012, and half at age 26 in 2013.
