

**S3 Fig**

**S3 Fig. Col22a1 expression in MIN6.** Col22a1 expression in MIN6 cells (a) transfected with siRNA negative control (SiCRT) or SiLnc03 for 72h or treated with 500 ng/ml Prl for 24h. Col22a1 expression was evaluated by RT-qPCR. Data are expressed as house keeping gene (Hprt) ratios (mean±SEM), n=3. One-way ANOVA with Bonferroni post hoc test was applied to determine statistical significances (no differences).
