1 Supplementary Figures

1.1 Scatterplot for the correlation of proportional time of surprise with Chinese wisdom rating.

(Note: the rank of the proportional time is used as the X-axis , just as the Spearman correlation analysis was applied, because the distribution of the proportional time data was not normal.)

1.2 Scatterplot for the correlation of proportional time of surprise with Berlin wisdom rating.

(Note: the rank of the proportional time is used as the X-axis , just as the Spearman correlation analysis was applied, because the distribution of the proportional time data was not normal.)
